22 Series – Ceramic Machining
MULTITEST CERAMIC INSERTS

Type of Tool: 22-001-XXX
Material: Ceramic
Surface Treatment: Nil

Application:
These ceramic inserts are used for testing of IC's leads contacts. It's to replace current test sockets made of torlon, vesper plastic materials whereby they are easily worn off and provide inconsistent test results. Many reject IC's have to be re-test again using torlon & vesper materials. Ceramic inserts provide a better & 100% sure test results.

Delivery: 1-2 weeks.
Packing: 1 pc per vile. **Minimum order:** 1 pc.

P/N: 22-001-030
MULITITEST Ceramic Insert – 430 mils
